Fabrication Method:

Rolled

Width:

24.000 inches

Length:

4.000 feet

Cross-sectional Thickness:

0.1250 inches

Basic Shape Style:

Solid

Min. Tensile Strength (psi):

57000 pounds per square inch

Heat Treatment:

Half hard

Material:

Copper alloy, astm b36, alloy 260

Material:

Copper alloy, astm b36, alloy 260

Specification Or Standard:

Half hard temper

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
