Fabrication Method:

Rolled

Width:

36.000 inches

Length:

8.000 feet

Cross-sectional Thickness:

0.1250 inches

Basic Shape Style:

Solid

Weight Per Unit Measure:

1.746 pounds per square foot

Min. Tensile Strength (psi):

31000 pounds per square inch

Material:

Aluminum alloy, qq-a-250/8, alloy 5052

Material:

Aluminum alloy, qq-a-250/8, alloy 5052

Specification Or Standard:

Alloy 5052 and temper h32

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
