Fabrication Method:

Rolled

Width:

48.000 inches

Length:

12.000 feet

Cross-sectional Thickness:

0.0710 inches

Basic Shape Style:

Solid

Weight Per Unit Measure:

0.989 pounds per square foot

Min. Tensile Strength (psi):

34000 pounds per square inch

Heat Treatment:

H-24 or h-34 strain hardened

Material:

Aluminum alloy, ams-qq-a-250/8, alloy 5052

Material:

Aluminum alloy 5052

Material Specification:

Ams-qq-a-250/8 assn standard single material response

Specification Or Standard:

Alloy 5052 and tempers h24 or h34

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
