Fabrication Method:

Rolled

Width:

Between 6.000 inches and 12.000 inches

Length:

Any acceptable

Cross-sectional Thickness:

0.0070 inches

Cross-sectional Width:

Between 6.000 inches and 12.000 inches

Basic Shape Style:

Solid

Weight Per Unit Measure:

Any acceptable

Min. Tensile Strength (psi):

Not rated

Minimum Yield Strength:

Not rated

Heat Treatment:

Spring temper

Material:

Brass, qq-b-613, comp 11

Material:

Copper alloy 260 or copper alloy 262 or copper alloy 268 or copper alloy 270 or copper alloy 272 or copper alloy 274 or copper alloy 280 or copper alloy 330 or copper alloy 331 or copper alloy 332 or copper alloy 335 or copper alloy 340 or copper alloy 342 or copper alloy 344 or copper alloy 345 or copper alloy 347 or copper alloy 348 or copper alloy 350 or copper alloy 353 or copper alloy 356 or copper alloy 360 or copper alloy 370

Material Specification:

Qq-b-613, comp 11 federal specification 1st material response

Specification Or Standard:

11 composition and strip form and spring temper

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
