Fabrication Method:

Rolled

Width:

48.000 inches

Length:

12.000 feet

Cross-sectional Thickness:

0.0900 inches

Basic Shape Style:

Solid

Weight Per Unit Measure:

1.300 pounds per square foot

Min. Tensile Strength (psi):

25000 pounds per square inch

Heat Treatment:

O-annealed

Material:

Aluminum alloy, ams-qq-a-250/8, alloy 5052

Material:

Aluminum alloy, ams-qq-a-250/8, alloy 5052

Specification Or Standard:

Alloy 5052 and condition annealed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A13100
