**Fabrication Method:**

Rolled

**Width:**

48.000 inches

**Length:**

12.000 feet

**Cross-sectional Thickness:**

0.0900 inches

**Basic Shape Style:**

Solid

**Weight Per Unit Measure:**

1.300 pounds per square foot

**Min. Tensile Strength (psi):**

25000 pounds per square inch

**Heat Treatment:**

O-annealed

**Material:**

Aluminum alloy, ams-qq-a-250/8, alloy 5052

**Material:**

Aluminum alloy, ams-qq-a-250/8, alloy 5052

**Specification Or Standard:**

Alloy 5052 and condition annealed

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A13100
