Fabrication Method:

Rolled

Width:

24.000 inches

Length:

12.000 feet

Cross-sectional Thickness:

0.1250 inches

Basic Shape Style:

Solid

Min. Tensile Strength (psi):

62000 pounds per square inch

Material:

Aluminum alloy, qq-a-250-4 2024 t4

Material:

Aluminum alloy, qq-a-250-4 2024 t4

Specification Or Standard:

4 temper

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A13100
