Fabrication Method:

Hot finish and rolled

Width:

48.000 inches

Length:

96.000 inches

Basic Shape Style:

Solid

Min. Tensile Strength (psi):

80000 pounds per square inch

Minimum Yield Strength:

30000 pounds per square inch

Material:

Nickel, qq-n-281, class a

Material:

Nickel alloy 400

Material Specification:

Qq-n-281, class a federal specification 1st material response

Specification Or Standard:

A class and 6 form and as condition

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
