Fabrication Method:

Cold rolled

Width:

36.000 inches

Length:

144.000 inches

Cross-sectional Thickness:

0.0150 inches

Basic Shape Style:

Solid

Min. Tensile Strength (psi):

42 pounds per square inch

Minimum Yield Strength:

35 pounds per square inch

Special Features:

Temper t6; elongation pct 8; heat treated; corrosion resistant, welding of 6061 is not recommend; required for elevated strength

Material:

Aluminum alloy, 6061

Material:

Aluminum alloy 6061

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
