Fabrication Method:

Rolled

Width:

36.000 inches

Length:

10.000 feet

Cross-sectional Thickness:

0.0625 inches

Basic Shape Style:

Round

Perforation Diameter:

0.1875 inches

Special Features:

51 percent open and holes are staggered

Heat Treatment:

H-14 strain hardened, 1/2 hard

Material:

Aluminum alloy, 3003

Material:

Aluminum alloy 3003

Specification Or Standard:

Alloy 3003 and temper h14

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A13100
