Fabrication Method:

Hot rolled

Width:

36.000 inches

Length:

96.000 inches

Cross-sectional Thickness:

0.0800 inches

Basic Shape Style:

Solid

Heat Treatment:

Cold reduction, solution treated, descaled and leveled

Material:

Titanium alloy, bms7-281

Material:

Titanium alloy, bms7-281

Specification Or Standard:

Ti-15v-3cr-3al-3sn

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A13100
