**Fabrication Method:**

Wrought

**Width:**

42.870 inches

**Length:**

50.250 inches

**Cross-sectional Thickness:**

0.6250 inches

**Basic Shape Style:**

Solid

**Min. Tensile Strength (psi):**

130000 pounds per square inch

**Minimum Yield Strength:**

120000 pounds per square inch

**Special Features:**

Item is a plate, armor, turret fabricated from armor plate; uniquely shaped with cutouts and 5 holes, 1.000 in. Min, 1.140 in. Maximum dia

**Material:**

Titanium alloy, 12462708, cagec 19207 or titanium alloy, mil-a-46077

**Material:**

Titanium alloy, 12462708, cagec 19207 or titanium alloy, mil-a-46077

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A13100

**Mil-std (military Standard):**

Mil-a-46077 spec.
