Fabrication Method:

Wrought

Width:

38.000 inches

Length:

42.870 inches

Cross-sectional Thickness:

0.6250 inches

Basic Shape Style:

Solid

Min. Tensile Strength (psi):

130000 pounds per square inch

Minimum Yield Strength:

120000 pounds per square inch

Special Features:

Item is a plate, armor, turret fabricated from armor plate; uniquely shaped with cutouts and 5 holes, 1.000 in. Min and 1.140 in. Maximum dia

Material:

Titanium alloy, 12462708, cagec 19207 or titanium alloy, mil-a-46077

Material:

Titanium alloy, 12462708, cagec 19207 or titanium alloy, mil-a-46077

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100

Mil-std (military Standard):

Mil-a-46077 spec.
