Fabrication Method:

Wrought

Width:

28.470 inches

Length:

56.920 inches

Cross-sectional Thickness:

0.6250 inches

Basic Shape Style:

Solid

Min. Tensile Strength (psi):

130000 pounds per square inch

Minimum Yield Strength:

120000 pounds per square inch

Special Features:

Item is uniquely shaped with cutouts and 5 holes, 2.500 in. Min and 3.500 in. Maximum diameter fabricated per drawing

Material:

Titanium alloy, 12462708, caged 19207 or titanium alloy, mil-a-46077

Material:

Titanium alloy, 12462708, caged 19207 or titanium alloy, mil-a-46077

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100

Mil-std (military Standard):

Mil-a-46077 spec.
