Fabrication Method:

Rolled

Width:

6.000 inches

Length:

6.000 inches

Cross-sectional Thickness:

0.5000 inches

Basic Shape Style:

Solid

Min. Tensile Strength (psi):

34000 pounds per square inch

Special Features:

4 holes 0.281 in. Dia; 4 chamfered corners; fabricated per drawing

Heat Treatment:

H-34 strain hardened

Material:

Aluminum alloy, ams-qq-a-250/8, alloy 5052

Material:

Aluminum alloy, ams-qq-a-250/8, alloy 5052

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
