**Fabrication Method:**

Rolled

**Width:**

5.000 inches

**Length:**

7.870 inches

**Cross-sectional Thickness:**

0.2500 inches

**Basic Shape Style:**

Solid

**Min. Tensile Strength (psi):**

34000 pounds per square inch

**Special Features:**

4 holes 0.281 in. Dia; fabricated per drawing

**Heat Treatment:**

H-34 strain hardened

**Material:**

Aluminum alloy, ams-qq-a-250/8, alloy 5052

**Material:**

Aluminum alloy, ams-qq-a-250/8, alloy 5052

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A13100
