Fabrication Method:

Extruded

Length:

2.000 inches

Cross-sectional Thickness:

0.0500 inches

Cross-sectional Width:

0.950 inches

End Application:

Aircraft cen sec

Basic Shape Style:

Flat

Special Features:

Ingot is per industry specification ams-qq-a-250/12, alloy 7075, temper t7651, in order to have a fully item-identifying p/n, the dimensions 0.050x0.950x2.000 must be added as a suffix to the existing p/n

Heat Treatment:

T-6511 solution heat treated

Material:

Aluminum alloy, ams-qq-a-200/11, alloy 7075

Material:

Aluminum alloy, ams-qq-a-200/11, alloy 7075

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
