Fabrication Method:

Rolled

Width:

19.500 inches

Length:

60.000 inches

Basic Shape Style:

Solid

Edge Type:

Square

Min. Tensile Strength (psi):

50000 pounds per square inch

Minimum Yield Strength:

20000 pounds per square inch

Special Features:

Material is cuni; 19.5w x 60l x 0.625thk

Material:

Copper, mil-c-15726, comp 70-30

Material:

Copper alloy 715

Material Specification:

Mil-c-15726, comp 70-30 military specification 1st material response

Surface Condition:

Rough machined

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100

Mil-std (military Standard):

Mil-c-15726 spec.
