Fabrication Method:

Wrought

Width:

19.000 inches

Length:

100.000 inches

Cross-sectional Thickness:

Between 0.3120 inches and 0.3250 inches

Basic Shape Style:

Solid

Product Name:

Armor plate, left side, upper center

Special Features:

With long sides of plate vertical, left side is cut from point 21.11 inches from left top at 50 degree angle toward top of right edge and left side is also cut at same angle from point 78.87 inches from left top toward bottom right edge; right top and bottom angled corners are then rounded with radius of 0.25 inches

Material:

Aluminum, mil-a-46027, alloy 5063

Material:

Aluminum, mil-a-46027, alloy 5063

Supplementary Features:

Includes: plate (12466147-1) 1; bracket (10874762) 1; bracket (12298208-1) 1; angle (12298591) 1; retainer (12298207-1); retainer (12298592) 1; guard (10865814) 1; loop (10875556) 2; and nut (122969904-44) 2; see drawing for placement and location of mounting holes (7x 0.674-1.223)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
