Fabrication Method:

Extruded

End Application:

Integrated family of test equipment (ifte)

Min. Tensile Strength (psi):

45000 pounds per square inch

Minimum Yield Strength:

40000 pounds per square inch

Product Name:

Wrought aluminum plate

Heat Treatment:

T-6511 solution heat treated

Material:

Aluminum alloy, 6061

Material:

Aluminum alloy 6061

Surface Treatment:

Anodize

Surface Treatment:

Anodized

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A13100
