**Fabrication Method:**

Cast

**Length:**

1.083 feet

**Cross Section Inside Diameter:**

9.500 inches

**Cross Section Outside Diameter:**

14.000 inches

**Basic Shape Style:**

Round w/ core

**Min. Tensile Strength (psi):**

30000 pounds per square inch

**Special Features:**

Machined inside and outside

**Material:**

Copper alloy, qq-c-390, alloy 836

**Material:**

Copper alloy 836

**Material Specification:**

Qq-c-390, alloy 836 federal specification 1st material response

**Specification Or Standard:**

B5 composition and 2 type and as-cast condition

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A13100
