Aluminum Alloy Ingot - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/9650-01-274-3544

Overall Length:
24.000 inches
Overall Width:
4.000 inches
Overall Thickness:
4.000 inches
Weight:
20.000 pounds
Composition And Percentage:
91.99 by weight aluminum and 6.50 by weight silicon and 7.50 by weight silicon and 0.12 by weight iron and 0.10 by weight copper and
0.050 by weight manganese and 0.45 by weight magnesium and 0.70 by weight magnesium and 0.05 by weight zinc and 0.10 by weight
titanium and 0.20 by weight titanium
Impurities Limitation In Percent:
Beryllium 0.02 max
Specification Data:
81346-astm b179 professional/industrial association standard
Specification Or Standard:
A357.2 alloy
Departure From Cited Document:
As modified by material
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
T094-a
