Composition And Percentage:

87.85 by volume aluminum and 7.00 by volume zinc and 8.00 by volume zinc

Impurities Limitation In Percent:

Copper 0.40 min, 1.00 max; iron 0.80 max; manganese 0.60 max; magnesium 0.25 min, 0.50 max; chromium 0.35 max; silicon 0.25 max; titanium 0.25 max; nickel 0.15 max; total other elements 0.25 max

Supplementary Features:

Navy ships parts control center quality assurance clauses ex-5 apply

Specification Data:

81348-qq-a-371 government specification

Specification Or Standard:

713.1 alloy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T094-a
