Width:

12.000 inches

Thickness:

0.032 inches

Length:

3.000 inches

Attachment Method:

Hole

Environmental Protection:

Corrosion resistant and thermal shock resistant and weather resistant

Basic Shape Style:

Rectangular

Marking Designation:

Silhouette

Inscription:

Lifting power plant, lifting engine lifting differential

Features Provided:

Reflective surface

Color:

Blue, federal standard 595, 15102 inscription background

Material:

Aluminum alloy

Material Specification:

Qq-a-250/1, alloy 1100 federal specification single material response

Surface Treatment:

Anodize

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A528w0
