Width:

2.000 inches

Thickness:

0.003 inches

Length:

2.000 inches

Attachment Method:

Adhesive

Environmental Protection:

Accelerated light and salt spray resistant and water resistant and weather resistant and hydrocarbon fuel and cleaning resistant and temperature resistant

Basic Shape Style:

Rectangular

Marking Designation:

Design 1st side and legend 1st side and symbol 1st side

Inscription:

11st inscription: lines; 2nd inscription: warning danger laser light do not look into laser rangefinder eyepiece when firing laser into the blister door, the laser beam is dangerous nad could cause blindness; 3rd inscription: sun-burst symbol 1st side

Features Provided:

Pressure sensitive adhesive tape and removeable protective backing

Color:

White, federal standard 595, 37875 inscription background

Material:

Aluminum alloy

Surface Treatment:

Anodize

Surface Treatment Specification:

Mil-a-8625, type 1 military specification 1st treatment response or mil-a-8625, type 2 military specification 2nd treatment response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A528w0

Mil-std (military Standard):

Mil-a-8625 spec.
