Width:

Between 11.120 inches and 11.180 inches

Thickness:

0.008 inches

Length:

7.600 inches

End Application:

F-15i, next assembly 68a412700, effectivity - cum1&up

Product Name:

Plate, identification and instruction - main landing gear

Special Features:

Main gear assembly (air-oil strut) id plate pluse "warning - release air in strut before dissassembly" and strut servicing instructions. T-shaped with id on right side

Material:

Aluminum alloy

Material Specification:

Qq-a-250/1, alloy 1100, h14 federal specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A528w0
