End Application:

Ea-6b

Product Name:

Plate, legend

Special Features:

All characters medium condensed, aspect can vary (text 0.065, 0.115, 0.120, 0.125, 0.150, 0.185 and 0.200 high); single line legends are centered horizontally and vertically; material and finish, stainless steel, grade .302 s25 hard rolled, 0.004 (0.1) thick chemically etched and blackened (px-3 blackening salts a22613); packaging and marking, individual items in sealed bags, labeled with part number bags packed in plastic boxes, labeled with cage code, part number, quantity, batch number and clin number

Material:

Steel

Special Test Features:

Equipment is intended for installation in a pressurized compartment of an aircraft, material and finish properties will not be affected by exposure to the following equipment and conditions, ambient aircraft temperature, negative 54 degrees celsius to 71 degrees with a continuous operational temperature of up to 140 degree celsius and an intermittent operational temperature of up to 170 degrees celsius, humidity, altitude, shock, vibration, sand and dust, fungus, salt atmosphere, solvent resistance and abrasion resistance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A528w0
